

100% Dissolvable

CONCENTRATED LIQUID CHEMICAL PACS

- Entire Pac Dissolves Easily In Water • Safe and Easy to Use • Reduces Waste
- Precise Portion Control • Customized Cleaning Kits • Fixed Cost
- Reduced Spend • Inventory Control

Car & Truck Wash & Sheet

The product is designed to help sheet the water off the car. This is done by adding a rinse aid and a binding agent to the formulation that reduces the water's surface tension on the vehicle, allowing it to sheet off the car reducing drying time and water spots.

Manual Vehicle Washing

Add one ChemPac to 2 gallons of water in a pail and allow ChemPac to completely dissolve. Once ChemPac has dissolved, add an additional 1-3 gallons of water with a hose. Scrub vehicle as needed with brush. Rinse car completely with clean water. Allow vehicle to air dry.

Automatic Vehicle Washing Systems

Add one ChemPac for every 5 gallons of water to be added to a 55 gallon drum. Insert the chemical dip tube from the equipment into drum. Make sure the product is being pulled into the system. Adjust the amount of product being pulled into the system with the adjustment screw on intake block. One 55 gallon drum will clean 150-200 cars.

Vehicle Pressure Washing Systems

Add TWO ChemPacs to a 5 gallon pail. Add 3-5 gallons of water and allow ChemPac to completely dissolve. GENTLY mix after ChemPacs have completely dissolved to avoid foaming. Insert power washer dip tube into pail. Coat entire vehicle with detergent using power washer nozzle. Scrub vehicle as needed with brush.

Rinse car completely on high pressure.

Product Specifications

Color: Pink

Fragrance: Pleasant

Use Dilution: 1 ChemPac = 2-5 Gallons

pH: NA

Phosphates: None

Biodegradability: Complete

Solubility in Water: Complete
